## Summary

---

In general, I am very interested in Programming fields, computer literacy and such new types of modern technologies and I enjoy learning them. Currently, I build web applications based on Nodejs in Frontend Backend directions. In addition, I studied at Tashkent University of Information Technologies. My profession Economist, marketer and Programmer.

## Experience

---

### Front End Developer

Freelance Team • Tashkent, Tashkent

04/2022 - 06/2022

While working with the freelancer team, I tried to increase my knowledge, skills, and experience, and it was very beneficial to me, because during the period of work, I saw many of my shortcomings in real projects and managed to correct them. Communicating with clients in real projects, correctly completing the tasks given by them, and time management - the correct allocation of time, deadline - to complete my tasks by the last deadline

## Skills

---

Web Development, Front-End Development, HTML, CSS, Sass (Syntactically Awesome Style Sheets), JavaScript Object Notation, JQuery, Bootstrap, React.js, Node.js, Express.js, MongoDB, TypeScript, Next.js, Mui, Fullstack web developer, English, Time management, Microsoft excel, Microsoft word, Time management

## Education

---

### Bachelor degree

Tashkent University of Information Technologies • Tashkent, Tashkent

06/2023

During my studies at the university, I was able to learn computer literacy, web programming, and similar information technology fields in addition to my field of economics by studying at the Department of Economics, and these will be useful in my future work activities.

- Currently completing courses in computer science and statistics.
- Currently completing courses in Economics science.
